

# Interview an 'Expert'

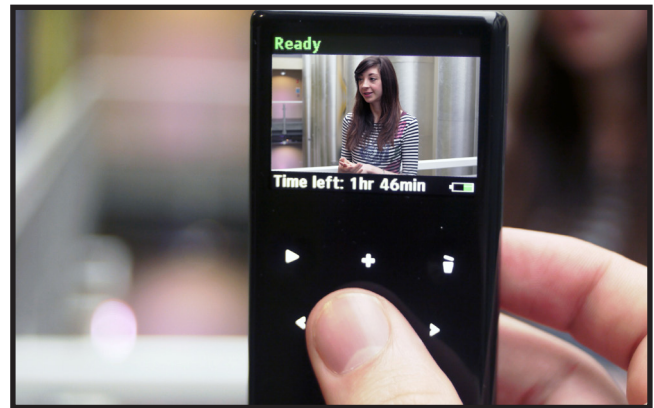

You are going to use a camera and your class mates to create an expert interview on the topic of your choice. Your expert will be a member of your group who will talk about their favourite subject or sport.

To do this you will need:

- **Camera Operator**
- **A Director**
- **An 'Expert'**
- **An interviewer**

## Step-by-Step

1. Prepare questions for the interviewer to ask the expert.
2. Try to find an interesting and relevant location or background for the interview
3. Switch on the Camera and place it on the tripod.
4. The director should position your interviewer and expert so that they are looking at each other.
5. Position the camera so that it is showing the top half of the person being the expert. This is called a mid-shot. (Example right!)
6. Begin the interview with both the interviewer and expert.
7. Complete the interview and then as a group, answer the questions below.

## What did you learn?

What was your chosen expert topic?

Why did you choose this topic? \_\_\_\_\_
