

Make a Music Video

Today we are going to make a music video.

You can record the school choir or just get a group together to play whatever instruments you have.

You will need:

- A director
- A producer
- A camera operator
- Musicians!

Step-by-Step

1. The shot we will be using is a wide shot. So the musicians and the instruments needs to be fully seen on the camera screen.

2. The director should choose the location where the musicians stand, and where the camera person stands.

4. The camera person will hold the camera and record the musicians playing. Make sure that the musician are in the middle of the screen.

5. Before the musicians start playing they could look at the camera and say the name of the song!

What next?

Try a close up shot of the instruments!

What did you learn?

What was your role?

Describe your footage

What could you add to the music video to make it more interesting? _____
